SUMMARY

A passionate and dedicated web developer with hands-on experience in building dynamic, user-friendly websites and applications. Proficient in the MERN stack (MongoDB, Express, React, Node.js). Eager to learn and continually improve, with a proven ability to work on projects independently and within teams. Developed several projects during coursework and personal time, demonstrating a commitment to high-quality code and innovative solutions. Strong understanding of web development best practices, responsive design, and modern development tools.

PROJECTS

Neuralize AI/ML Club	02/2024 - 08/2024
Vadodara	
Developed a responsive and efficient web application for the Neuralize AI/ML club. The frontend was built using React.js, where I gained hands-on experience in connecting the application with APIs. Additionally, I made contributions to the backend, improving my understanding of full-stack development. Throughout the project, I focused on ensuring a smooth user experience and optimizing performance. The application is currently deployed, providing a real-world example of my ability to deliver production-ready solutions.
